

Ahmed Badr Mostafa

Front-End Angular Developer

Egypt, Cairo | (+20) 1554357738 | ahmed.badr.mostafaa@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Creative and detail-oriented Front-End Angular Developer with hands-on experience building responsive, scalable web applications for ERP and digital learning platforms. Strong background in Angular, TypeScript, RxJS, state management, and reusable component architecture, with a focus on performance, accessibility, and clean user-centered interfaces.

SKILLS

- Angular (v17+), TypeScript, RxJS, NgRx
- PrimeNG, REST API Integration, Lazy Loading, Route Guards
- Reusable Component Design, Responsive UI, Git/GitHub, Unit Testing

EXPERIENCE

Front-End Developer | UMAMI E-Learning Solutions

2026 - Present

- Build and enhance responsive web interfaces for digital learning solutions, supporting engaging and user-friendly learning experiences.
- Develop reusable Angular components and front-end flows that improve maintainability, consistency, and delivery speed across modules.
- Collaborate with design and cross-functional teams to translate learning-product requirements into accessible and high-impact UI implementations.
- Contribute to performance-focused front-end development using modern Angular practices, clean architecture, and API-driven integration.

Front-End Developer | Smartly Techs

September 2024 - 2026

- Led development of a modular Angular 17 ERP system covering Finance, HR, and Logistics modules using TypeScript, PrimeNG, and NgRx.
- Reduced development time by about 20% through reusable components, shared patterns, and clean front-end architecture.
- Integrated RESTful APIs with RxJS interceptors and implemented route guards and lazy loading to improve reliability and load performance.
- Improved maintainability through Git/GitHub workflows, linting, and unit testing, helping reduce recurring bugs.

PROJECTS

ERP Platform

- Developed a scalable ERP web application using Angular 17, TypeScript, PrimeNG, and NgRx for Finance, HR, and Logistics workflows.
- Applied lazy loading, reusable dashboards, and modular UI patterns to improve navigation speed and reduce setup time for new modules.

Egyptian Football Association Website (efa.com.eg)

- Enhanced responsiveness, layout consistency, and visual alignment with the organization brand across desktop and mobile views.
- Optimized HTML, CSS, and JavaScript for better loading speed and stronger SEO readiness.

Eldar News Portal

- Built a dynamic news publishing interface with HTML, CSS, and JavaScript, focusing on accessibility and cross-browser compatibility.
- Implemented responsive layouts and SEO-friendly structure to improve usability and engagement.

LMS Platform

- Built a responsive Learning Management System using Angular to support course browsing, enrollment flows, lesson delivery, and progress tracking.
- Implemented modular UI components, API integration, and role-based screens to deliver a smooth learning experience across desktop and mobile devices.

LMS User Management Console

- Developed an administrative console for managing learners, instructors, roles, permissions, and user lifecycle actions within the LMS environment.
- Created dashboards and management workflows for account control, access assignment, and user operations, improving platform administration efficiency.

EDUCATION

Bachelor of Computer Science

Thebes Academy, Cairo, Egypt | September 2018 - August 2022

- Specialized in Software Engineering and Web Technologies.
- Built academic projects using HTML5, CSS3, JavaScript, and Angular, establishing a strong foundation in responsive UI development and API integration.
