

AHMED BADR MOSTAFA

Front-End Developer / Web Engineer

Egypt, Cairo • (+20) 1554357738 • ahmed.badr.mostafaa@gmail.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Achievement-driven Front-End Developer and Web Engineer specializing in the modern Angular ecosystem (v17 - v21) and TypeScript 5.9 to deliver high-performance, accessible, and scalable enterprise SaaS applications. Proven track record in orchestrating multi-tenant platforms, cloud-native learning management systems (LMS/SMS), and complex operational dashboards for over 300,000 registered users across cross-government jurisdictions. Expert in standalone components, dynamic reactive streams (RxJS/Signals), SSR/hydration patterns, and robust unit-testing infrastructure (Vitest/Jasmine) to engineer clean, secure, and user-centered digital solutions.

TECHNICAL SKILLS

Core Frameworks & Langs:

Angular (v17 - v21), React.js, TypeScript 5.9, JavaScript (ES6+), HTML5, CSS3, SCSS, RxJS, NgRx

UI & Component Architecture:

PrimeNG, Reusable Component Design, Signals, Standalone Styles, Tailwind CSS, PostCSS, Angular CDK

Performance, Rendering &

Routing:

Angular SSR/Hydration, Lazy Loading, Route Guards, RxJS Interceptors, Modular Shell Micro-Architecture

Tools, APIs & Testing:

Git/GitHub, SignalR WebSockets, Vitest, Jasmine, Karma, ApexCharts, FullCalendar, Video.js, ngx-translate

PROFESSIONAL EXPERIENCE

Front-End Developer – UMAMI E-Learning Solutions

Jan 2026 – Present | Cairo, Egypt

- **Architecture & Delivery:** Architecting large-scale modern Angular 19/21 workspaces (`umami-lms` and `one\_console`) utilizing standalone-style application configurations, modern providers, and lazy-loaded routes across highly structured routing files to deliver robust SaaS platforms.
- **State & SSR Rendering:** Implementing seamless client-server rendering pipelines utilizing Angular SSR/Hydration alongside Angular Signals for lightweight computed state and optimized DOM re-rendering.
- **Core Product Engineering:** Developing core transactional interfaces including an advanced graphical course content builder, custom SCORM tracking frameworks, granular multi-tenant permission layers, and business CRM matrices.
- **Enterprise Systems & Testing:** Spearheading robust multi-tenant token/subdomain lookup structures paired with localized RTL directional flipping (ngx-translate). Maintaining comprehensive test coverage with around 74 custom Vitest/Jasmine spec files across guards, shared components, and interceptors.

Front-End Developer – Smartly Techs

Sep 2024 – Jan 2026 | Cairo, Egypt

- **Project Impact:** Spearheaded front-end development for a modular, enterprise-grade ERP system encompassing detailed Finance, HR, and Logistics workflows using Angular 17, TypeScript, and PrimeNG.
- **Efficiency Gains:** Successfully cut development time by approximately 20% across feature sets by establishing shared UI patterns and implementing a robust reusable component catalog.
- **State & Performance:** Managed complex cross-module application state via NgRx, while leveraging lazy loading and custom route guards to drastically maximize initial load times.
- **Reliability:** Integrated asynchronous RESTful data streams with custom RxJS interceptors and implemented automated linting and unit testing to scale codebase reliability and minimize recurring production bugs.

KEY PROJECTS

UMAMI LMS Console (`one\_console`) – Frontend Angular Developer

Angular 21, TypeScript 5.9, SSR, Signals, PrimeNG, Tailwind CSS, Vitest

- Engineered a modular, enterprise SaaS admin console for central tenant management, CRM accounts, support ticketing systems, adoption analytics, feature flags, billing/renewals, and immutable audit logs.
- Implemented clean authentication/authorization guard mechanisms managing JWT handling, permission-based access control, and robust refresh-token rotation retry logic interceptors.
- Integrated real-time websocket alert dispatch networks using Microsoft SignalR built with connection auto-reconnect handling and bound to Angular Signals to reflect responsive connection state.
- Created a premium shared infrastructure layer composed of paginated data-driven tables, compound filters, multi-step reactive forms, Lucide icons, and toast modules backed by 74 strict unit test spec files.

TSI Unified Certification & Training Platform – Front-End Engineer

Angular 20, Signals, Standalone Components, TypeScript, Lazy Loading

- Developed user-facing portals for an international, cloud-native SaaS system supporting 300,000+ registered users across multiple government authorities (Dubai, Sharjah, Ajman).
- Implemented highly complex features including 3D CSS envelope transitions for digital certificates, real-time exam dashboards with webcam proctoring anomalies, multi-tenant portal routing, and role-based shell adaptive layouts.
- Enforced a highly dynamic i18n system driven by a localized database runtime terminology engine ensuring clean multi-language layout behaviors for 6 languages.

UMAMI One Platform - Learning Management System (LMS) – Frontend Angular Developer

Angular 19, TypeScript, RxJS, SCSS, PrimeNG, SignalR, ApexCharts, Video.js, HLS.js, Quill

- Built and maintained the frontend architecture of a large-scale Learning Management System for administrators, teachers, and students encompassing granular profiles, course learning paths, and digital certificates.
- Developed modular features using lazy-loaded standalone routes, interactive course builders, unit/lesson layouts, question banks, rich assignments tracking, and custom media player environments (Video.js, HLS.js, PDF.js).
- Injected Microsoft SignalR websocket handlers for push notifications, group chats, active user counters, and reactive quiz timers, natively supporting complete RTL layouts via ngx-translate.

School Management System (SMS) – Front-End Developer

Angular 21, TypeScript, RxJS, PrimeNG, Tailwind CSS, SignalR

- Architected a large-scale, multi-role web application with adaptive interfaces tailored for students, teachers, parents, administrators, applicants, and interviewers.
- Built core modular, lazy-loaded architectures encompassing admissions registries, grading books, live tracking attendance, question banks, interactive quizzes, and assignment modules.
- Engineered strict multi-tenant layout customization dynamically resolving tenant logos, custom themes, assets, and landing profiles extracted dynamically based on active subdomains.

Egyptian Football Association Website (efa.com.eg) – UI & Performance Developer

HTML5, CSS3, JavaScript, Responsive UI, SEO Optimization

- Re-engineered platform layouts to ensure strict cross-device responsiveness. Optimized legacy DOM trees, style layers, and script execution to significantly boost loading speeds and SEO rankings.

Eldar News Portal – Web UI Developer

HTML5, CSS3, Vanilla JavaScript, WCAG Accessibility

- Designed and deployed a dynamic news publishing layout focused on cross-browser compatibility, flawless responsive structures, and accessible design compliant with semantic guidelines.

EDUCATION

Bachelor of Computer Science – Thebes Academy

Sep 2018 – Aug 2022 | Cairo, Egypt

- Specialized in Software Engineering and Web Technologies. Mastered computer science algorithms, data handling, and web API architectures.
